การส่งขึ้น Tableau Public

The screenshot illustrates the steps to publish a Tableau workbook to Tableau Public. Three numbered steps are highlighted:

1. Clicking 'Publish to Tableau Public' in the Server menu.
2. The 'Extract Data' dialog box, which allows specifying how to store data in the extract (Data Storage) and how much data to extract (Filters, Aggregation, Number of Rows).
3. The 'Tableau Server Sign In' dialog box, which prompts for the server URL (https://public.tableau.com/) and provides options to connect or cancel.

Additional dialog boxes shown include 'Save Workbook to Tableau Public' and a 'Publish complete' notification. The background displays a bar chart with the following data points:

Category	Quantity
Office Supplies	5,100
Office Supplies	4,700
Office Supplies	3,500
Office Supplies	2,800
Office Supplies	2,200
Office Supplies	1,800
Office Supplies	1,500
Office Supplies	1,200
Office Supplies	1,000
Office Supplies	800
